G12 Analysis Checklist

The following procedures are common for most g12 analyses and have been approved by the g12 procedure review committee in the g12 analysis procedures manuscript [1]. By checking the "yes" boxes below, I hereby confirm that I understood and applied the procedures in accordance with the g12 analysis note. I also understand that if a procedure in the analysis is not done in accordance with the g12 analysis procedures, the box "no" should be checked and a separate analysis note on the procedure is required. If a procedure in the g12 analysis note is not applicable, to the analysis, the box "N/A" should be checked.

Procedure				
Used PART bank reconstruction for the	N/A	Yes	No	
analysis. EVNT was NOT used				
Momentum corrections as described in	N/A	Yes	No	
the g12 note				
Beam energy correction as described in	N/A	Yes	No	
the g12 note				
Inclusive Good run list as described in ta-	N/A	Yes	No	
ble 7. Individual analysis may use a subset				
of it				
Target density and its uncertainty as de-	N/A	Yes	No	
scribed in the g12 note				
Photon flux calculation procedure as de-	N/A	Yes	No	
scribed in the g12 note				
Lower limit for the systematic uncertainty	N/A	Yes	No	
of normalized yield is 5.7%				
Photon polarization calculation procedure	N/A	Yes	No	
as described in the g12 note				
Systematic uncertainty of the photon po-	N/A	Yes	No	
larization as described in the g12 note				
gsim parameters	N/A	Yes	No	
gpp smearing parameters	N/A	Yes	No	

DC efficiency map	N/A	Yes	No
EC knockout	N/A	Yes	No
Minimal TOF knockout	N/A	Yes	No
Lepton ID is used	N/A	Yes	No
